

Paper Shavings Animal Bedding

"good for your horse, good for your budget, good for the environment"

Paper Shavings Animal Bedding is a **unique alternative** to the standard wood shavings, wood pellets and straw bedding used for horse stall bedding and livestock bedding.

Manufactured from directory waste paper obtained directly from publishing companies, it provides a **clean, consistent, readily available supply** of material that is free of contaminants. With special equipment, the waste paper is processed into very small pieces. **Virtually dust free bedding** results from a vacuum system which extracts dust and tiny particles during the process.

Product Features

- Superior absorbency
- Very soft-provides excellent cushion
- Reduces ammonia and barn odors
- Non allergenic
- Virtually Dust Free
- Non toxic
- Biodegradable
- Environmentally Smart
