Bedding Amount: Depending on the type of pet you own, cover the floor of your pet's cage with 1-3 inches of Paper Shavings. Nesting and burrowing pets may require additional bedding.

Cleaning: It is recommended to remove soiled bedding and clean enclosure at least once a week. Multiple pets in the cage may require more frequent cleaning to provide a fresh comfortable environment. Replenish with Paper Shavings as needed.

Important: Monitor your pets daily to provide ample feed so they do not consume their bedding. Seek veterinary care if your pet consumes large quantities of bedding.

Disposal: Simply discard or compost for the best environmental benefit.
